Scope

Cancer Immunology Research publishes outstanding original articles reporting major advances that span the discipline of cancer immunology, from basic investigations of host-tumor interactions to developmental therapeutics in model systems, early translational studies in patients, and in-depth analysis of late-stage clinical trials. The journal also publishes reviews and opinion pieces of broad significance across the spectrum of cancer immunology research. As the premier resource for disseminating knowledge of immunology to the cancer research community, the journal catalyzes cross-disciplinary work that yields a deeper understanding of the host-tumor relationship, more potent cancer treatments, and improved clinical outcomes.

Cancer Immunology Research is abstracted and/or indexed in Current Contents/Clinical Medicine, MEDLINE, Science Citation Index, Scopus, and Web of Science.
