

Supplementary Figure S4. Pmel-1 CTLs produce large amounts of IFN- γ but not TNF- α in vitro. 1×10^5 B16 tumor cells were cocultured with 1×10^5 in vitro activated CD90.1 $^+$ CTLs in a 96-well plate and 24 hours later supernatants were harvested and the concentration of cytokines measured by Mouse Bio-Plex ProTM Assays 23-Plex Panel (Bio-Rad).
